Subject: RE: Drum Removal

Hi Tom

In speaking with Joey today we feel the debris is bulky enough for us to separate a decent portion of it from the soil. If you all approve, we can try to remove as much debris as possible and create a profile for macro-encapsulation into Deer Trail under the alternative debris standard. This should remove a few hundred yards from the incineration as long as Joyce will approve Clean Harbors – Deer Trail facility.

Please advise when you can.

Thank you!

Tobi,

Let's start to get them offsite for disposal.

Thanks TJK

Subject: RE: Drum Removal

Hi Tom

Understood. We currently have 11 bins full of 2B material now. We will need more bins to move the material in 2B out of our way to continue with the drum removal process. I was under the impression from our phone call that I would be removing some of this soil for disposal. Based on the comments below I am unclear if you want us to move any of the bins off site for disposal or keep stalk piling them here.

We have approximately ½ - ¾ of a day left of pit-testing.

Subject: Drum Removal

Tobi,

Please keep the 2B drum removal operations continuing and if we need to bench the soils back for access this is acceptable. Please have impacted benched soils put into roll-offs for disposal. We are looking at the Phase 1 soil data which I will forward shortly. If you have any questions, please let me know. Hope everyone has a great weekend.

Thanks TJK
